Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS

- "I need to maintain my farm and crop records properly."
- Manual records take too much time."
- Manual records take too much time."

DOES

- Maintains farm and crop records.
- Updates farmer and crop information.
- Checks reports to monitor farm productivity.

THINKS

- "My farm data should be stored safely."

- “I need accurate records to manage my farm efficiently.”
- “It would be easier if all information was available in one system.”

PERSONA
NAME: Ravi / Farmer

FEELS

- Frustrated by manual paperwork.
- Concerned about data loss and incorrect records.
- Satisfied when information is organized and easily accessible.
