Project Name	Farm Management System
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code(files and folders)	Yes(Salesforce configuration and metadata-farm Management data)
2	README / Setup Guide	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files	YES(salesforce objects,fields,relationships and sample data)
5	Environment configuration file	NA
6	Deployed application URL	YES(https://orgfarm-ea2af51934-dev-ed.develop.my.salesforce-setup.com/lightning/setup/SetupOneHom

		e/home)
7	APK / Executable binary	YES
8	Dockerfile / Containerization config	NA
9	Test files and test results	YES
10	Demo video or walkthrough	YES

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Farm Management System

```
├── Project Documentation
│   └── Farm Management System Project Document
├── Salesforce
│   ├── Farmers
│   ├── Farms
│   ├── Crops
│   ├── Buyers
│   ├── Reports
│   └── Dashboards
└── Test Cases
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://orgfarm-ea2af51934-dev-ed.develop.my.salesforce-setup.com/lightning/setup/ObjectManager/01Iaj00000FK9Xx/Details/view
Login Credentials (Demo)	Email : subikshaanandh08@gmail.com Password : UPt3ETRl
Platform / Hosting Provider	Salesforce , Salesforce cloud
Repository Link	**https://github.com/subikshaanandh08-boop/naan-mudhalvan-project**

Demo Video Link
https://drive.google.com/file/d/16oXICXOSE6OguVidV_4q_uluYKSzKSLA/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 1: Clone the repository

Step 2: Create a virtual environment

Step 3: Activate the virtual environment

Step 4: Install dependencies

Step 5: Configure the environment

Step 6: Run the application

Step 7: Open the Application

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet connection may be required for online services/ API features	Ensure a stable internet connection.

2	Prediction/AI results depend on the quality of the input data.	Provide a accurate crop, soil, weather and farm details.
3	External API services may have usage limits.	Use valid API keys and monitor API usage.
