Technology Stack

Date	29 september 2026
Team ID	6ab2ac2a1266c775575a9e56
Project Name	Farm Management System
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	**Frontend / Client-Side**	*HTML, CSS, JavaScript*	*Used to create a simple, responsive and user-friendly interface for farmers.*

2	**Backend / Server-Side** *Python Flask*	*Used to handle business logic, user requests and communication between frontend and database*
3	**Database / Data Storage** *MySQL*	*Used to store farmer, farm, crop, irrigation, fertilizer and activity data in an organized way.*
4	**Cloud / Hosting / Deployment** *Render*	*Used to deploy and host the web application online.*

5	**Version Control & CI/CD** *GitHub*	*Used for storing source code, version control and team collaboration.*

6	**Third-Party APIs/ Other Tools** *Google Maps API*	*Can be used to display farm locations and map-related information.*
